

“WHATS IN YOUR POCKETS”

BY

**JIM PAYNE, CAPTAIN RECSUE ONE
B.C.F.D.**

Forever I ran with multiple if not too many “Tools of the Trade” in my pockets. It finally came to me to think about what tools that I have and use on a regular basis. It was a true turning point to lighten the load. For every Brother Firefighter out there think about your “Tools of the Trade” that you need most...

Left Pocket

**Self Made Bailout System: 6,000 lb Industrial hook, 6,000lb Carabineer,
60 foot of Rescue Rope**

Right Pocket

Elevator Key, Rescue Blade. Center Punch, Combi Screwdriver Kit, Channel Lock Multi Rescue Tool, Pliers, (1) 6,000lb Choker (20ft.)

Inside Pocket

**Extrication Gloves, Extra Hood
(Not shown: beef jerky)**

Outside Left

Light of choice "Survivor"

"Tool of Choice"

I have been using this tool for about a year and it is a great tool. The tool was designed by "Fire Hooks Unlimited"

As always I start off every course I teach explaining that I want to learn something new every day, no one has every answer, if I don't have an answer or explanation I will find someone who does. Always remember networking and sharing Fire Service Info Keeps Us All Safe
